In a world of a social media-saturated market, it's great to find one that sticks with the basics. Since 2015, when it was launched, MIXS has had a strong hold on the German market and its innovative approach has proven successful. The app is also a great way for companies to connect with customers, as well as a wonderful solution for directors. See a list of providers below. Features Users have the option to choose from three different backgrounds, including their own photos. Users can also choose their favourite background. Photos are integrated into the viewfinder which is displayed at the bottom of the screen, and allows users to view photos and films in their own way. Users may browse their own database by taking photos or searching by keywords. Users can browse film and photo libraries created by other users. Users can share photos by email, Facebook or Twitter, and can add tags to their photos or upload a text

description for each photo. Software The app was developed in February 2015 by TodoMedia GmbH, founded in November 2014. While the app runs on Windows 8.1 or Windows 10, the user interface should be familiar to Windows Phone 8 users. Unlike Windows Phone 8 which didn't permit external users to create new libraries, the new library view in MIXS supports up to 10,000 photos and videos. Social media integration While the app does not support social networks such as Facebook, it does allow users to view profiles and books on social networks. The app allows users to share photos with their Facebook, Twitter or Wechat accounts. Apart from its basic features, the app also offers several useful tools. For example, if users find a shared photo they don't want to keep, users can delete it by moving it to the "Trash bin".
